BIG CLIMATE PLAN SETS UP NEW YORK AS GLOBAL LEADER

ZERO EMISSIONS BY 2050

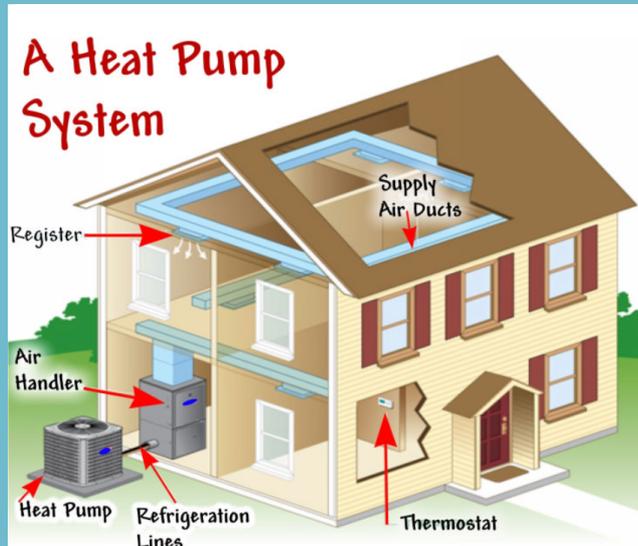

Business Groups Deride
Carbon Goal as Costly
and Impractical

Big Buildings Hurt the Climate. New York City Hopes to Change That.

To fight climate change, the city is forcing the buildings, like the Empire State Building and Trump Tower, to reduce greenhouse gas emissions.

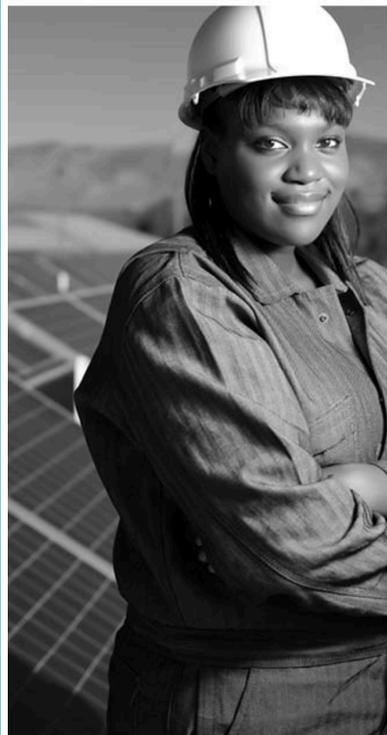

We know
the major
areas of
growth

What does that mean for investment and jobs?

more than
157k clean energy jobs in 2020
 across New York State

Clean Energy Employment by Technology (number of jobs, December 2020)

Energy Efficiency
121k

Renewable Electric Power Generation
23k

Clean and Alternative Transportation
9k

Renewable Fuels
2.6k

Grid Modernization and Energy Storage
2.3k
